

Light Source - LHM254

Wavelength Correction Hg Lamp Light Source

The LHM254 is a mercury lamp light source has high output stability and lines at 253.7 nm, 313.2 nm, 365.0 nm, 435.7 nm, 546.1 nm 577.0 nm and 579.0 nm, making it especially useful for wavelength calibration of spectrographs. The housing is compatible with the slit body of the Omni-lambda series spectrographs.
